

Anaerostipes Probiotic

Next-generation butyrate-producing probiotic*

CD CLB030 | 30 vegetarian capsules

Anaerostipes Probiotic is a live, once-daily probiotic that delivers a next-generation strain exclusive to Designs for Health. *Anaerostipes caccae* naturally lives in a healthy gut microbiome but may be present in lower amounts for some people. This keystone probiotic strain has been shown in animal studies to directly produce butyrate — an important molecule that fuels intestinal cells, supports a healthy gut barrier, and promotes digestive comfort and immune balance.* In a healthy gut, bacteria like *Anaerostipes* turn fiber from the foods we eat into butyrate.* Simply put, butyrate is vital for optimal gut health, especially in the lower gastrointestinal (GI) tract where it's needed most. This product delivers *Anaerostipes* to help promote daily GI comfort and healthy digestion, powered by butyrate production, which may also help support more mealtime confidence.*

GASTROINTESTINAL HEALTH*

May promote direct butyrate production in the lower GI tract*

Supports healthy immune and inflammatory responses, gut barrier function, and GI regularity, powered by butyrate production*

Promotes healthy gut microbial diversity*
