

ArthroSoothe™ provides joints with nutritional support for lubrication, free movement, and healthy function.\* Joints, cartilage, ligaments, tendons, and synovial fluid (for joint lubrication) undergo a continuous, but slow turnover and remodeling process. This is affected by many physiological factors, such as diet, supplements, activity, stress, gut health, immune status, infections, aging, hormones, toxic load, and/or various medications. The bioactive compounds in ArthroSoothe™ promote healthy cartilage and a normal inflammatory response to support joint function.\*

The ingredients in ArthroSoothe™ target various aspects of joint physiology to support healthy joints.\* Glucosamine is an important component of the cells found in cartilage tissue and may help support joint function and cartilage health.\*

Methylsulfonylmethane (MSM) is a sulfur-containing compound found naturally in plants, animals, and humans that is necessary for collagen production in the body, and thus, promoting joint health.\* Collagen is a primary structural component of connective tissue including cartilage and joints. Hyaluronic acid is a lubricant in cartilage that is important for joint movement and function. Green lipped mussel supports joint function and promotes a healthy inflammatory response.\* ArthroSoothe™ also features the herbs, Boswellia, turmeric, and resveratrol to help promote a healthy inflammatory response.\* Targeted amounts of niacin (vitamin B3), zinc, selenium, copper, and manganese are included in their bioactive forms to further support joint function and health.\*

## **Benefits\***

- Supports healthy joints
- · Promotes healthy cartilage
- Promotes a healthy inflammatory response

## **Recommended Use**

Take 4 capsules per day with meals or as directed by your health-care practitioner. (Divided dosing recommended.)

Boswellin® is a registered trademark of Sabinsa Corporation. TRAACS® is a registered trademark of Albion Laboratories, Inc. Veri-te™ is a trademark of Evolva or its affiliates in the United States and other countries.

## **Highlights**

- Glucosamine sulfate, MSM, and hyaluronic acid to support joint function\*
- Collagen II to promote healthy cartilage\*
- Boswellia (as Boswellin® standardized to 70% boswellic acids), turmeric (standardized to 95% curcuminoids), and resveratrol (as Veri-te™) to promote a healthy inflammatory response\*
- Green lipped mussel (as GlycoMarine®) to support joint health and a healthy inflammatory response\*
- Provides minerals in their most bioactive forms for superior absorption and bioavailability
