

Kidney Korrekt™

Herbs + Mushroom Extracts

URINARY HEALTH*

Kidney Korrekt™ features a blend of traditionally used medicinal mushroom extracts and herbs with potential health-promoting benefits, including the support of normal kidney function, the support of antioxidant status in the body, and helping to promote a healthy inflammatory response.* Research demonstrates the potential for these ingredients to support healthy renal function.*

The kidneys play a critical role in the production and concentration of urine, filtering normal metabolic waste products from the blood, and maintaining proper mineral and electrolyte levels. Waste products, including toxins, metabolites, and excess nutrients, are filtered out into the urine and excreted.

The kidneys retain certain minerals (such as sodium, potassium, and magnesium, and other nutrients) and return them into the bloodstream. The ingredients in this formula support the proper function of the glomeruli (the tiny blood vessels at the main site where blood is filtered in the kidneys).*

Free radicals may contribute to cellular and tissue damage, including the kidneys. The phytochemicals in the ingredients in Kidney Korrekt™ may support the body's antioxidant status to help neutralize the free radicals.* These phytochemicals may also help promote healthy glucose metabolism that may also support kidney health.*

Benefits*

- Helps promote normal kidney function
- Supports antioxidant status
- Helps promote a healthy inflammatory response

Recommended Use

Take 2 capsules per day or as directed by your health-care practitioner.

Champex® is a registered trademark of Ricom Corporation.

CordycepsPrime™ is a trademark of NuLiv Science of NuLiv USA, Inc.
