

MycoSupreme™

FULL-SPECTRUM BLEND OF 8 MUSHROOM EXTRACTS

MycoSupreme™ is a standardized, full-spectrum blend of eight mushroom extracts used to support immune health.* One serving contains a clinically relevant amount of 225 mg of each mushroom, utilizing the whole mushroom parts and the extracellular compounds they naturally produce. MycoSupreme™ possesses a wide range of beneficial properties, which may support a healthy immune response, cardiovascular health, liver health, detoxification, and normal blood glucose metabolism.*

Benefits*

- Blend of 8 standardized mushrooms, including reishi, chaga, lion's mane, cordyceps, maitake, shiitake, agaricus, and turkey tail
- Contains 225 mg of each mushroom, totaling 1,800 mg per serving
- Supports a healthy immune response
- Supports brain function
- Supports detoxification
- Supports a normal response to stress

Recommended Use

Take three capsules per day with food or as directed by your health-care practitioner.

Highlights

Reishi mushrooms have been shown to possess immune-supportive properties and they also support normal blood glucose metabolism and liver health.*

Chaga mushrooms help support a normal immune response.*

Lion's mane mushrooms may benefit those individuals with mild cognitive impairment and may help support healthy brain function and memory. Lion's mane mushrooms may also support a normal response to stress.*

Cordyceps mushrooms may promote exercise performance and help reduce fatigue. This type of mushroom may also support healthy immune function. In addition, cordyceps mushrooms may promote sexual health.*

Maitake mushrooms may support immune activity, especially when combined with shiitake and reishi mushrooms.*

Shiitake mushrooms may possess immune-supportive, antioxidant properties. Other potential benefits that have been observed are the support of normal blood glucose and lipid metabolism, and the support of healthy blood pressures that are already within the normal range.*

Turkey Tail mushrooms may possess antioxidant properties and support a normal immune response.*
