

PaleoCleanse Plus™

Daily Detoxification Support*

 PPCPCH | 525 g (1.2 lbs) | PPPBVN | 540 g (1.2 lbs)

PaleoCleanse Plus™ supports the body's normal detoxification process, helping to promote the clearance of harmful compounds and bringing the body back into a healthy balance.* This product may be supportive during periodic detox programs due to the unavoidable toxin accumulation over the course of a person's life.* It may be especially helpful during heightened exposure to environmental contaminants, such as pollutants and other potentially harmful substances, a structured weight management program, or when advised by a health-care practitioner.* Altogether, PaleoCleanse Plus™ is uniquely positioned to support overall liver health and normal detoxification as a comprehensive dairy-free functional food powder.*

LIVER/DETOXIFICATION*

May help support the body's normal phase I and phase II detoxification processes*

Supports liver health*

May help support healthy inflammatory responses*

Supports antioxidant status*

Promotes amino acid metabolism and protein status*

JUST THE FACTS:

Compare supplement facts to the leading brands

- **Protein** – A nutrient required in large amounts to support proper healing, antioxidant status, and healthy inflammatory responses, and promote amino acid metabolism and protein status.*
- **Vitamins B2, B3, B6, B9, B12, glutathione, flavonoids, and branched-chain amino acids (BCAAs)** – Many players, such as these, are involved in detoxification — the process where one substance, like toxins, is transformed into another, potentially rendering them less harmful and more easily excreted by the body.*
- **Milk thistle, inositol, and choline** – Help support bile production so that potentially harmful toxins can be removed through normal bowel movements.*
- **L-cysteine, L-methionine, molybdenum, methylsulfonylmethane (MSM), N-acetyl-L-cysteine, taurine, S-adenosylmethionine (SAME), vitamins B6, B9, and B12** – Important nutrients and ingredients to support the detoxification process and liver health, and promote healthy inflammatory responses.*
- **Calcium-D-glucarate** – Supports the detoxification of toxins and excess hormones, helping to promote hormonal balance.*
- **Glutathione** – The well-known “master antioxidant” promotes a smooth detoxification process.* Glutathione is combined with its supportive nutrients like vitamins C and E, B3 (niacin), and N-acetyl-L-cysteine to support normal detoxification.*
- **Vitamins C, E, and A, selenium, green tea extract, glutathione, and a proprietary blend of alkalizing high-antioxidant vegetable and fruit juice powders** – Support antioxidant status, which is needed for healthy detoxification.*

Recommended Use: Mix 35 g (approximately 1 scoop) in 10 to 12 ounces of liquid, or as directed by your health-care practitioner. Use a shaker bottle or blender, and shake or mix well. For best blending results, the liquid should be at room temperature.

**Ipsos 2023 survey among 160 U.S. functional medicine practitioners who are aware of Designs for Health and recommend supplements. Among these practitioners, in an average month, Designs for Health is their most recommended practitioner supplement brand, meaning a brand that is sold by health-care practitioners, in their office. (For sample definition, go to <https://www.designsforhealth.com>)
