

Periobiotic™ Silver

Probiotic toothpaste with whitening hydroxyapatite

Introducing a fluoride-free Science-First™ toothpaste. The same way probiotics work to promote gastrointestinal health, beneficial oral bacteria may also help maintain dental health. This is why Periobiotic™ Silver proudly features Dental-Lac™, a probiotic that research shows supports a healthy balance of bacteria in the mouth for sparkling results.

Periobiotic™ Silver incorporates whitening hydroxyapatite to promote healthy tooth enamel and overall brightness. Hydroxyapatite is the primary mineral component of healthy tooth enamel, which can be worn down over time by acidic foods and drinks, harsh orthodontic glues and braces, and microbial imbalances within the mouth.

ORAL HEALTH

Nourishes a healthy oral microbiome

Remineralizes enamel and dentin

Supports sensitive teeth and helps freshen breath

Cleans the tooth surface, gums, and tongue

Protects enamel and gums from unwanted microbes

Whitening hydroxyapatite to help promote a bright smile
