

Probioimmune™

Supports Immune Health in Children*

immune health*

Probioimmune™ lozenges support immune health in children and adults.* This great-tasting formula combines the Immuno-LP20™ strain of *Lactobacillus plantarum* and Wellmune® (beta-glucan from the yeast organism *Saccharomyces cerevisiae*) to support the body's immune response.* These strains are particularly beneficial for helping support nasopharyngeal health in children and adolescents.*

Wellmune® is a beta-glucan that is derived from the cell wall of a highly purified, proprietary strain of the yeast, *Saccharomyces cerevisiae*. Beta-glucans help train the immune system to prepare more efficiently. Immuno-LP20™, heat-killed *Lactobacillus plantarum* L-137, derived from a strain of commensal bacteria found in fermented foods, supports the body's immune balance to help the body promote a healthy immune response.* It may also support a healthy inflammatory response.*

Benefits*

- Supports immune health in children and adults
- Supports natural immune defenses
- Promotes nasopharyngeal health

Recommended Use

For children weighing up to 75 lbs:

Take 1 lozenge per day

For children weighing more than 75 lbs:

Take 1 lozenge twice per day or as directed by your health-care practitioner.

Allow lozenge to dissolve slowly and completely in the mouth and swallow.
