

Prostect™

Supports Healthy Prostate and Urinary Function*

Prostect™ is uniquely formulated to support healthy prostate and urinary function in men.* It contains a targeted blend of standardized cranberry extract, proprietary flower pollen extract, and concentrated pomegranate extract that work synergistically and possess complementary actions.* Unlike classic saw palmetto-based formulas, Prostect™ is not intended to affect the body's levels of dihydrotestosterone (DHT), which is the active form of testosterone.

Flower pollen extract contains many prostate-supportive nutrients including vitamins, minerals, amino acids, and phytosterols. It supports the body's natural response to inflammation and has been shown in studies to support health and quality of life in the presence of certain conditions related to the prostate.*

Cranberry extract is one of the most well-researched nutrients for urinary tract health. It also supports prostate cellular health and the body's response to oxidative stress.* The pomegranate in Prostect™ is a highly concentrated, standardized polyphenol extract. Pomegranate contains many bioactive constituents that have been shown to support a healthy inflammatory response and a healthy cellular environment to support a healthy prostate.*

Prostect™ is a synergistic blend of three ingredients to support healthy prostate size and function, urinary tract health, cellular health, and a normal response to inflammation and oxidative stress.*

Benefits*

- Healthy prostate size and function
- Support normal urination flow and frequency in the normal range
- Prostate cellular health
- Support a normal normal response to inflammation and oxidative stress

Recommended Use

Take 2 capsules per day with a meal or as directed by your health-care practitioner.
